

25104477D

SENATE BILL NO. 977

Offered January 8, 2025

Prefiled January 7, 2025

A BILL to amend and reenact §§ 22.1-199.1, 22.1-253.13:2, and 51.1-617 of the Code of Virginia and to amend the Code of Virginia by adding a section numbered 22.1-98.3, relating to public schools; Standards of Quality; certain calculations; support services.

Patrons—Hashmi and Carroll Foy

Referred to Committee on Education and Health

Be it enacted by the General Assembly of Virginia:

1. That §§ 22.1-199.1, 22.1-253.13:2, and 51.1-617 of the Code of Virginia are amended and reenacted and that the Code of Virginia is amended by adding a section numbered 22.1-98.3 as follows:

§ 22.1-98.3. Department; certain funding calculations.

A. In calculating nonpersonal costs in the Standards of Quality funding formula, the Department shall include costs associated with work-related travel, leases, rentals, and non-capital facility expenditures.

B. In calculating the deduction of federal funds in the Standards of Quality funding formula, the Department shall examine actual school division spending on support costs as a percentage of actual school division spending on all public education costs, with certain exceptions such as food service.

C. Starting with fiscal year 2029, in calculating costs in the Standards of Quality funding formula, the Department shall include all employee benefit costs incurred by a majority of all school divisions, including costs related to retirement, health care, life insurance, and payout of earned but unused leave. Starting in fiscal year 2026, the Department shall collect in the Annual School Report data collection any data relevant to completing such calculation.

D. When calculating the cost of salaries under the Standards of Quality funding formula, the Department shall include facilities staff and transportation staff salaries in the calculation of any cost of competing adjustment to salaries for instructional and support positions that is provided as part of the state share of basic aid pursuant to the general appropriation act.

E. When calculating the cost of any compensation supplement for instructional and support positions under the Standards of Quality funding formula, the Department shall include and estimate the cost of such a compensation supplement for facilities staff.

F. The Department shall not apply any cap on inflation rate adjustments to nonpersonal cost categories during the biennial process of re-benchmarking the direct aid to the public education budget.

G. The Department shall calculate salaries and other Standards of Quality formula cost assumptions using the unweighted division average. The unweighted division average shall give equal weight to each school division in the calculation of such assumptions, thereby ensuring that costs are more accurately reflected across school divisions.

§ 22.1-199.1. Programs designed to promote educational opportunities.

A. The General Assembly finds that Virginia educational research supports the conclusion that poor children are more at risk of educational failure than children from more affluent homes and that reduced pupil/teacher ratios and class sizes result in improved academic performance among young children; to this end, the General Assembly establishes a long-term goal of reducing pupil/teacher ratios and class sizes for grades K through three in those schools in the Commonwealth with high or moderate concentrations of at-risk students.

With such funds as are provided in the appropriation act for this purpose, there is hereby established the statewide voluntary pupil/teacher ratio and class size reduction program for the purpose of reaching the long-term goal of statewide voluntary pupil/teacher ratio and class size reductions for grades K through three in schools with high or moderate concentrations of at-risk students, consistent with the provisions provided in the appropriation act.

In order to facilitate these primary grade ratio and class size reductions, the Department shall calculate the state funding of these voluntary ratio and class size reductions based on the incremental cost of providing the lower class sizes according to the greater of the division average per-pupil cost of all divisions or the actual division per-pupil cost. Localities shall provide matching funds for these voluntary ratio and class size reductions based on the composite index of local ability to pay. School divisions shall notify the Department of their intention to implement the reduced ratios and class sizes in one or more of their qualifying schools by August 1 of each year. By March 31 of each year, school divisions shall forward data substantiating that each participating school has a complying pupil/teacher ratio.

In developing each proposed biennium budget for public education, the Board shall include funding for

INTRODUCED

SB977

these ratios and class sizes. These ratios and class sizes shall be included in the annual budget for public education.

B. The General Assembly finds that educational technology is one of the most important components, along with highly skilled teachers, in ensuring the delivery of quality public school education throughout the Commonwealth. Therefore, the Board shall strive to incorporate technological studies within the teaching of all disciplines. Further, the General Assembly notes that educational technology can only be successful if teachers and administrators are provided adequate training and assistance. To this end, the following program is established.

With such funds as are appropriated for this purpose, the Board shall award to the several school divisions grants for expanded access to educational technology. Funding for educational technology training for instructional personnel shall be provided as set forth in the appropriation act.

Funds for improving the quality and capacity of educational technology shall also be provided as set forth in the appropriation act, including (i) funds for providing a technology resource assistant to serve every elementary school in this Commonwealth and (ii) funds to maintain the currency of career and technical education programs. Any local school board accepting funds to hire technology resource assistants or maintain currency of career and technical education programs shall commit to providing the required matching funds, based on the composite index of local ability to pay.

Each qualifying school board shall establish an individualized technology plan, which shall be approved by the Superintendent, for integrating technology into the classroom and into schoolwide instructional programs, including career and technical education programs. The first priority for funding shall be consistent with those components of the Board's revised six-year technology plan that focus on (i) retrofitting and upgrading existing school buildings to efficiently use educational technology; (ii) providing (a) one network-ready multimedia microcomputer for each classroom, (b) a five-to-one ratio of pupils to network-ready microcomputers, (c) graphing calculators and relevant scientific probes/sensors as required by the Standards of Learning, and (d) training and professional development on available technologies and software to all levels and positions, including professional development for personnel delivering career and technical education at all levels and positions; and (iii) assisting school divisions in developing integrated voice-, video-, and data-connectivity to local, national and international resources.

This funding may be used to implement a local school division's long-range technology plan, at the discretion of the relevant school board, if the local plan meets or exceeds the goals and standards of the Board's revised six-year technology plan and has been approved by the Superintendent.

The Department of Education, the Department of General Services, and the Virginia Information Technologies Agency shall coordinate master contracts for the purchase by local school boards of the aforementioned educational technologies and reference materials.

A technology replacement program shall be, with such funds as may be appropriated for this purpose, implemented to replace obsolete educational hardware and software. As provided in subsection D of § 22.1-129, school boards may donate obsolete educational technology hardware and software that are being replaced. Any such donations shall be offered to other school divisions and to preschool programs in the Commonwealth or to public school students as provided in guidelines to be promulgated by the Board. Such guidelines shall include criteria for determining student eligibility and need, a reporting system for the compilation of information concerning the number and socioeconomic characteristics of recipient students, and notification of parents of the availability of such donations of obsolete educational hardware and software.

C. The General Assembly finds that local autonomy in making decisions on local educational needs and priorities results in effective grassroots efforts to improve education in the Commonwealth's public schools only when coupled with sufficient state funding; to this end, the following block grant program is hereby established. With such funds as are provided in the appropriation act, the Department shall distribute block grants to localities to enable compliance with the Commonwealth's requirements for school divisions in effect on January 1, 1995. Therefore, for the purpose of such compliance, the block grant herein established shall consist of a sum equal to the amount appropriated in the appropriation act for the covered programs, including the at-risk add-on program; dropout prevention; specifically Project YES; Project Discovery; English as a second language programs; including programs for overage, nonschooled students; Advancement Via Individual Determination (AVID); the Homework Assistance Program; programs initiated under the Virginia Guaranteed Assistance Program, except that such funds shall not be used to pay any expenses of participating students at institutions of higher education; and school/community health centers. Each school board may use any funds received through the block grant to implement the covered programs and other programs designed to save the Commonwealth's children from educational failure.

D. In order to reduce pupil/teacher ratios and class sizes in elementary schools, from such funds as may be appropriated for this purpose, each school board may employ additional classroom teachers, remedial teachers, and reading specialists for each of its elementary schools over the requirements of the Standards of Quality. State and local funding for such additional classroom teachers, remedial teachers, and reading

specialists shall be apportioned as provided in the appropriation act.

E. D. Pursuant to a turnaround specialist program administered by the Department, local school boards may enter into agreements with individuals to be employed as turnaround specialists to address those conditions at the school that may impede educational progress and effectiveness and academic success. Local school boards may offer such turnaround specialists or other administrative personnel incentives such as increased compensation, improved retirement benefits in accordance with Chapter 6.2 (§ 51.1-617 et seq.) of Title 51.1, increased deferred compensation in accordance with § 51.1-603, relocation expenses, bonuses, and other incentives as may be determined by the board.

F. E. The General Assembly finds that certain schools have particular difficulty hiring teachers for certain subject areas and that the need for such teachers in these schools is particularly strong. Accordingly in an effort to attract and retain high quality teachers, local school boards may offer instructional personnel serving in such schools as a member of a middle school teacher corps administered by the Department incentives such as increased compensation, improved retirement benefits in accordance with Chapter 6.2 (§ 51.1-617 et seq.) of Title 51.1, increased deferred compensation in accordance with § 51.1-603, relocation expenses, bonuses, and other incentives as may be determined by the board.

For purposes of this subsection, "middle school teacher corps" means licensed instructional personnel who are assigned to a local school division to teach in a subject matter in grades six, seven, or eight where there is a critical need, as determined by the Department. The contract between such persons and the relevant local school board shall specify that the contract is for service in the middle school teacher corps.

§ 22.1-253.13:2. Standard 2. Instructional, administrative, and support personnel.

A. The Board shall establish requirements for the licensing of teachers, principals, superintendents, and other professional personnel.

B. School boards shall employ licensed instructional personnel qualified in the relevant subject areas.

C. Each school board shall assign licensed instructional personnel in a manner that produces divisionwide ratios of students in average daily membership to full-time equivalent teaching positions, excluding special education teachers, principals, assistant principals, school counselors or certain other licensed individuals as set forth in subdivision H 4, and librarians, that are not greater than the following ratios: (i) 24 to one in kindergarten with no class being larger than 29 students; if the average daily membership in any kindergarten class exceeds 24 pupils, a full-time teacher's aide shall be assigned to the class; (ii) 24 to one in grades one, two, and three with no class being larger than 30 students; (iii) 25 to one in grades four through six with no class being larger than 35 students; and (iv) 24 to one in English classes in grades six through 12. After September 30 of any school year, anytime the number of students in a class exceeds the class size limit established by this subsection, the local school division shall notify the parent of each student in such class of such fact no later than 10 days after the date on which the class exceeded the class size limit. Such notification shall state the reason that the class size exceeds the class size limit and describe the measures that the local school division will take to reduce the class size to comply with this subsection.

Within its regulations governing special education programs, the Board shall seek to set pupil/teacher ratios for pupils with intellectual disability that do not exceed the pupil/teacher ratios for self-contained classes for pupils with specific learning disabilities.

Further, school boards shall assign instructional personnel in a manner that produces schoolwide ratios of students in average daily memberships to full-time equivalent teaching positions of 21 to one in middle schools and high schools. School divisions shall provide all middle and high school teachers with one planning period per day or the equivalent, unencumbered of any teaching or supervisory duties.

D. Each local school board shall employ with state and local basic, special education, gifted, and career and technical education funds a minimum number of licensed, full-time equivalent instructional personnel for each 1,000 students in average daily membership (ADM) as set forth in the appropriation act.

E. In addition to the positions supported by basic aid and in support of regular school year programs of prevention, intervention, and remediation, state funding, pursuant to the appropriation act, shall be provided to fund certain full-time equivalent instructional positions for each 1,000 students in grades K through 12 who are identified as needing prevention, intervention, and remediation services. State funding for prevention, intervention, and remediation programs provided pursuant to this subsection and the appropriation act may be used to support programs for educationally at-risk students as identified by the local school boards.

To provide algebra readiness intervention services required by § 22.1-253.13:1, school divisions may employ mathematics teacher specialists to provide the required algebra readiness intervention services. School divisions using the Standards of Learning Algebra Readiness Initiative funding in this manner shall only employ instructional personnel licensed by the Board.

F. In addition to the positions supported by basic aid and those in support of regular school year programs of prevention, intervention, and remediation, state funding, pursuant to the general appropriation act, shall be provided to support ratios of instructional positions to English language learner students, based on each such student's English proficiency level, as established in the general appropriation act, which positions may

181 include dual language teachers who provide instruction in English and in a second language.

182 To provide flexibility in the instruction of English language learners who have limited English proficiency
183 and who are at risk of not meeting state accountability standards, school divisions may use state and local
184 funds from the Standards of Quality Prevention, Intervention, and Remediation account to employ additional
185 English language learner teachers or dual language teachers to provide instruction to identified limited
186 English proficiency students. Using these funds in this manner is intended to supplement the instructional
187 services provided in this section. School divisions using the SOQ Prevention, Intervention, and Remediation
188 funds in this manner shall employ only instructional personnel licensed by the Board.

189 G. In addition to the full-time equivalent positions required elsewhere in this section, each local school
190 board shall employ one reading specialist for each 550 students in kindergarten through grade five and one
191 reading specialist for each 1,100 students in grades six through eight. Each such reading specialist shall have
192 training in science-based reading research and evidence-based literacy instruction practices. In addition, each
193 such reading specialist shall have training in the identification of and the appropriate interventions,
194 accommodations, and teaching techniques for students with dyslexia or a related disorder and shall serve as
195 an advisor on dyslexia and related disorders. Such reading specialist shall have an understanding of the
196 definition of dyslexia and a working knowledge of (i) techniques to help a student on the continuum of skills
197 with dyslexia; (ii) dyslexia characteristics that may manifest at different ages and grade levels; (iii) the basic
198 foundation of the keys to reading, including multisensory, explicit, systemic, and structured reading
199 instruction; and (iv) appropriate interventions, accommodations, and assistive technology supports for
200 students with dyslexia.

201 To provide reading intervention services required by § 22.1-253.13:1, school divisions may employ
202 reading specialists to provide the required reading intervention services. School divisions using the Early
203 Reading Intervention Initiative funds in this manner shall employ only instructional personnel licensed by the
204 Board. Local school divisions that employ a sufficient number of reading specialists to meet this staffing
205 standard may assign reading specialists to grade levels according to grade levels with greatest need,
206 regardless of the individual staffing standards established for grades kindergarten through five and six
207 through eight.

208 H. Each local school board shall employ, at a minimum, the following full-time equivalent positions for
209 any school that reports fall membership, according to student enrollment:

210 1. Principals, one full-time in each elementary school, middle school, and high school, to be employed on
211 a 12-month basis;

212 2. Assistant principals in elementary schools, one half-time at 600 students, one full-time at 900 students;
213 assistant principals in middle schools, one full-time for each 600 students; assistant principals in high schools,
214 one full-time for each 600 students; and school divisions that employ a sufficient number of assistant
215 principals to meet this staffing requirement may assign assistant principals to schools within the division
216 according to the area of greatest need, regardless of whether such schools are elementary, middle, or
217 secondary;

218 3. Librarians in elementary schools, one part-time to 299 students, one full-time at 300 students; librarians
219 in middle schools, one-half time to 299 students, one full-time at 300 students, two full-time at 1,000
220 students; librarians in high schools, one half-time to 299 students, one full-time at 300 students, two full-time
221 at 1,000 students. Local school divisions that employ a sufficient number of librarians to meet this staffing
222 requirement may assign librarians to schools within the division according to the area of greatest need,
223 regardless of whether such schools are elementary, middle, or secondary; and

224 4. School counselors, one full-time equivalent position per 325 students in grades kindergarten through
225 12.

226 However, in order to meet the staffing requirements set forth in this subdivision, any local school board (i)
227 may employ, under a provisional license issued by the Department for three school years with an allowance
228 for an additional two-year extension with the approval of the division superintendent, any professional
229 counselor licensed by the Board of Counseling, clinical social worker licensed by the Board of Social Work,
230 psychologist licensed by the Board of Psychology, or other licensed counseling professional with appropriate
231 experience and training, provided that any such individual makes progress toward completing the
232 requirements for full licensure as a school counselor during such period of employment or (ii) in the event
233 that the school board does not receive any application from a licensed school counselor, professional
234 counselor, clinical social worker, or psychologist or another licensed counseling professional with
235 appropriate experience and training to fill a school counselor vacancy in the school division, may enter into
236 an annual contract with another entity for the provision of school counseling services by a licensed
237 professional counselor, clinical social worker, or psychologist or another licensed counseling professional
238 with appropriate experience and training. Local school boards that employ a sufficient number of individuals
239 to meet the staffing requirements set forth in this subdivision may assign such individuals to schools within
240 the division according to the area of greatest need, regardless of whether such schools are elementary, middle,
241 or high schools.

242 I. Local school boards shall employ five full-time equivalent positions per 1,000 students in grades

kindergarten through five to serve as elementary resource teachers in art, music, and physical education.

J. Local school boards shall employ two full-time equivalent positions per 1,000 students in grades kindergarten through 12, one to provide technology support and one to serve as an instructional technology resource teacher.

To provide flexibility, school divisions may use the state and local funds for instructional technology resource teachers to employ a data coordinator position, an instructional technology resource teacher position, or a data coordinator/instructional resource teacher blended position. The data coordinator position is intended to serve as a resource to principals and classroom teachers in the area of data analysis and interpretation for instructional and school improvement purposes, as well as for overall data management and administration of state assessments. School divisions using these funds in this manner shall employ only instructional personnel licensed by the Board.

K. Local school boards may employ additional positions that exceed these minimal staffing requirements. These additional positions may include, but are not limited to, those funded through the state's incentive and categorical programs as set forth in the appropriation act.

L. A combined school, such as kindergarten through 12, shall meet at all grade levels the staffing requirements for the highest grade level in that school; this requirement shall apply to all staff, except for school counselors or certain other licensed individuals as set forth in subdivision H 4, and shall be based on the school's total enrollment. The Board may grant waivers from these staffing levels upon request from local school boards seeking to implement experimental or innovative programs that are not consistent with these staffing levels.

M. School boards shall, however, annually, on or before December 31, report to the public (i) the actual pupil/teacher ratios in elementary school classrooms in the local school division by school for the current school year; and (ii) the actual pupil/teacher ratios in middle school and high school in the local school division by school for the current school year. Actual pupil/teacher ratios shall include only the teachers who teach the grade and class on a full-time basis and shall exclude resource personnel. School boards shall report pupil/teacher ratios that include resource teachers in the same annual report. Any classes funded through the voluntary kindergarten through third grade class size reduction program shall be identified as such classes. Any classes having waivers to exceed the requirements of this subsection shall also be identified. Schools shall be identified; however, the data shall be compiled in a manner to ensure the confidentiality of all teacher and pupil identities.

N. Students enrolled in a public school on a less than full-time basis shall be counted in ADM in the relevant school division. Students who are either (i) enrolled in a nonpublic school or (ii) receiving home instruction pursuant to § 22.1-254.1, and who are enrolled in public school on a less than full-time basis in any mathematics, science, English, history, social science, career and technical education, fine arts, foreign language, or health education or physical education course shall be counted in the ADM in the relevant school division on a pro rata basis as provided in the appropriation act. Each such course enrollment by such students shall be counted as 0.25 in the ADM; however, no such nonpublic or home school student shall be counted as more than one-half a student for purposes of such pro rata calculation. Such calculation shall not include enrollments of such students in any other public school courses.

O. Each school board shall provide at least three specialized student support positions per 1,000 students. For purposes of this subsection, specialized student support positions include school social workers, school psychologists, school nurses, licensed behavior analysts, licensed assistant behavior analysts, and other licensed health and behavioral positions, which may either be employed by the school board or provided through contracted services.

In order to fill vacant school psychologist positions, any local school board may employ, under a provisional license issued by the Department for three school years with an allowance for an additional two-year extension with the approval of the division superintendent, clinical psychologists licensed by the Board of Psychology, provided that any such individual makes progress toward completing the requirements for full licensure as a school psychologist during such period of employment.

P. Each local school board shall provide those support services that are necessary for the efficient and cost-effective operation and maintenance of its public schools. *Support services positions shall be funded based on a calculation of prevailing costs and shall not be subject to any method of funding calculation that caps the number of funded support services positions based on a ratio of such positions to students enrolled the local school division, provided, however, that such methodology shall not apply to the following Standards of Quality support positions: division superintendent, school board members, pupil transportation positions, or specialized student support positions as described in subsection O.*

For the purposes of this title, unless the context otherwise requires, "support services positions" shall include the following:

1. Executive policy and leadership positions, including school board members, superintendents and assistant superintendents;
2. Fiscal and human resources positions, including fiscal and audit operations;
3. Student support positions, including (i) social work administrative positions not included in subsection

O; (ii) school counselor administrative positions not included in subdivision H 4; (iii) homebound administrative positions supporting instruction; (iv) attendance support positions related to truancy and dropout prevention; and (v) health and behavioral administrative positions not included in subsection O;

4. Instructional personnel support, including professional development positions and library and media positions not included in subdivision H 3;

5. Technology professional positions not included in subsection J;

6. Operation and maintenance positions, including facilities; pupil transportation positions; operation and maintenance professional and service positions; and security service, trade, and laborer positions;

7. Technical and clerical positions for fiscal and human resources, student support, instructional personnel support, operation and maintenance, administration, and technology; ~~and~~

8. School-based clerical personnel in elementary schools; part-time to 299 students, one full-time at 300 students; clerical personnel in middle schools; one full-time and one additional full-time for each 600 students beyond 200 students and one full-time for the library at 750 students; clerical personnel in high schools; one full-time and one additional full-time for each 600 students beyond 200 students and one full-time for the library at 750 students. Local school divisions that employ a sufficient number of school-based clerical personnel to meet this staffing requirement may assign the clerical personnel to schools within the division according to the area of greatest need, regardless of whether such schools are elementary, middle, or secondary; *and*

9. *Any central office clerical position not described in subdivisions 1 through 8.*

Pursuant to the appropriation act, support services shall be funded from basic school aid.

School divisions may use the state and local funds for support services to provide additional instructional services.

Q. Notwithstanding the provisions of this section, when determining the assignment of instructional and other licensed personnel in subsections C through J, a local school board shall not be required to include full-time students of approved virtual school programs.

R. Each local school board shall designate a faculty member to serve as a special education parent/family liaison. The special education parent/family liaison shall serve as a resource to parents and families to understand and engage in (i) the referral, evaluation, reevaluation, and eligibility process if they suspect that their child has a disability and (ii) the IEP process and shall work in collaboration with the special education family support centers established pursuant to § 22.1-214.5. Each school board shall post the name of the designated special education parent/family liaison publicly on its website.

S. *There is hereby established the At-Risk Program for the purpose of supporting programs and services for students who are educationally at-risk, including prevention, intervention, or remediation activities required pursuant to Standard 1 (§ 22.1-253.13:1); teacher recruitment programs and incentives; Dropout Prevention; community and school-based truancy officer programs; Advancement Via Individual Determination (AVID); Project Discovery; programs for English language learners; the hiring of additional school counselors, testing coordinators, and licensed behavioral analysts; and programs relating to increasing the success of disadvantaged students in completing a high school degree and providing opportunities to encourage further education and training. A portion of the state funding provided for the At-Risk Program shall be allocated to school divisions on a flat per-student percentage rate set out in the general appropriation act and a portion of such funding shall be allocated to school divisions on a variable rate set out in the general appropriation act based on the concentration of poverty in the school division.*

T. *State-funded add-ons shall be applied for each special education student as follows: a student weight of 0.6 of basic aid per-pupil funding, which shall be adjusted by the Department during the biennial process of re-benchmarking the direct aid to the public education budget. Such additional Standards of Quality funding shall be calculated by multiplying the relevant weight by the relevant basic aid per-pupil amount for each special education student in each school division. Local funding obligations for such add-ons shall be determined by the composite index of local ability-to-pay.*

§ 51.1-617. Definitions.

As used in this chapter, unless the context requires a different meaning:

"Board" means the Board of Trustees of the Virginia Retirement System.

"Eligible employee" means any turnaround specialist or member of the middle school teacher corps providing services for a participating public school division pursuant to subsections *D and E* ~~and F~~ of § 22.1-199.1.

"Participating employer" means any local public school board that offers and pays the costs of improved retirement benefits as described in subsections *D and E* ~~and F~~ of § 22.1-199.1.

"Plan" means the defined contribution plan established pursuant to this chapter and the provisions of § 401 (a) of the Internal Revenue Code of 1986, as amended.

"Qualified participant" means an eligible employee of a participating employer.
