 131 *the public.*

132 C. The residential property disclosure statement shall be delivered in accordance with § 55.1-709.

133 D. The Real Estate Board shall make available on its website a flood risk information form. Such form
 134 shall be substantially as follows:

135 Flood Risk Information Form

136 The purpose of this information form is to provide property owners and potential property owners with
 137 information regarding flood risk. This information form does not determine whether a property owner will be
 138 required to purchase a flood insurance policy. That determination is made by the lender providing a loan for
 139 the property at the lender's discretion.

140 Mortgage lenders are mandated under the Flood Disaster Protection Act of 1973 and the National Flood
 141 Insurance Reform Act of 1994 to require the purchase of flood insurance by property owners who acquire
 142 loans from federally regulated, supervised, or insured financial institutions for the acquisition or improvement
 143 of land, facilities, or structures located within or to be located within a Special Flood Hazard Area. A Special
 144 Flood Hazard Area (SFHA) is a high-risk area defined as any land that would be inundated by a flood, also
 145 known as a base flood, having a one percent chance of occurring in a given year. The lender reviews the
 146 current National Flood Insurance Program (NFIP) maps for the community in which the property is located to
 147 determine its location relative to the published SFHA and completes the Standard Flood Hazard
 148 Determination Form (SFHDF), created by the Federal Emergency Management Agency (FEMA). If the
 149 lender determines that the structure is indeed located within a SFHA and the community is participating in
 150 the NFIP, the borrower is then notified that flood insurance will be required as a condition of receiving the
 151 loan. A similar review and notification are completed whenever a loan is sold on the secondary loan market
 152 or when the lender completes a routine review of its mortgage portfolio.

153 Properties that are not located in a SFHA can still flood. Flood damage is not generally covered by a
 154 standard home insurance policy. It is prudent to consider purchasing flood insurance even when flood
 155 insurance is not required by a lender. Properties not located in a SFHA may be eligible for a low-cost
 156 preferred risk flood insurance policy. Property owners and buyers are encouraged to consult with their
 157 insurance agent about flood insurance.

158 What is a flood? A flood is a general and temporary condition of partial or complete inundation of two or
 159 more acres of normally dry land area or of two or more properties, at least one of which is the policyholder's
 160 property, from (i) overflow of inland or tidal waters, (ii) unusual and rapid accumulation or runoff of surface
 161 waters from any source, (iii) mudflow, or (iv) collapse or subsidence of land along the shore of a lake or
 162 similar body of water as a result of erosion or undermining caused by waves or currents of water exceeding
 163 anticipated cyclical levels that result in a flood.

164 FEMA is required to update Flood Maps every five years. Flood zones for this property may change due
 165 to periodic map updates. To determine what flood zone or zones a property is located in a buyer can visit the
 166 website for FEMA's National Flood Insurance Program or the Virginia Department of Conservation and
 167 Recreation's Flood Risk Information System website.
