"Mental health evaluation" means an evaluation that is carried out by a mental health professional for the purpose of determining the mental health needs of the incarcerated person and whether it is safe for the person to be placed in restorative housing.

"Mental health professional" means the same as that term is defined in § 54.1-2400.1 who is trained in mental health evaluations.

"Out-of-cell programmatic interventions" means that the incarcerated person is either in a congregate setting with other incarcerated persons receiving educational, vocational, rehabilitative, or therapeutic instruction or is individually with one or more staff members who will be offering medical, mental health, or some other social service.

1. When an incarcerated person makes a request to be placed in restorative housing or isolated confinement for his own protection, the facility shall bear the burden of establishing a basis for refusing the request; but before placing an incarcerated person in restorative housing or isolated confinement of any designation for his own protection, the facility administrator shall place an incarcerated person in a less restrictive setting, including by transfer to the general population of another institution or to a special-purpose housing unit for incarcerated persons who face similar threats, unless the incarcerated person faces a security risk so great that no less restrictive setting would be sufficient or practicable to ensure the incarcerated person's safety.
