

Department of Planning and Budget
2025 General Assembly Session
State Fiscal Impact Statement

The changes required in this bill would require updates to the CCSP Guidance Manual and Virginia Case Management System (VaCMS). The updated reporting requirements would require changes in the VaCMS and the Data Warehouse at DSS in order to collect the necessary data. Implementing the change in the two systems would cost an estimated \$400,000 one-time. This cost would be absorbed by existing federal Child Care and Development Block Grant funding. Existing staff can complete the work required to implement these changes, therefore no budget amendment is necessary.

Other: None.
