

25100519D

SENATE BILL NO. 1462

Senate Amendments in [] - February 3, 2025

A BILL to amend and reenact § 22.1-253.13:4 of the Code of Virginia, relating to high school graduation requirements; history and social studies credits; certain substitutions permitted.

Patrons Prior to Engrossment—Senators Bagby, Perry, Aird and Boysko

Referred to Committee on Education and Health

Be it enacted by the General Assembly of Virginia:

1. That § 22.1-253.13:4 of the Code of Virginia is amended and reenacted as follows:

§ 22.1-253.13:4. Standard 4. Student achievement and graduation requirements.

A. Each local school board shall award diplomas to all secondary school students, including students who transfer from nonpublic schools or from home instruction, who meet the requirements prescribed by the Board and meet such other requirements as may be prescribed by the local school board and approved by the Board. Provisions shall be made to facilitate the transfer and appropriate grade placement of students from other public secondary schools, from nonpublic schools, or from home instruction as outlined in the standards for accreditation. The standards for accreditation shall include provisions relating to the completion of graduation requirements through Virtual Virginia. Further, reasonable accommodation to meet the requirements for diplomas shall be provided for otherwise qualified students with disabilities as needed.

In addition, each local school board may devise, vis-a-vis the award of diplomas to secondary school students, a mechanism for calculating class rankings that takes into consideration whether the student has taken a required class more than one time and has had any prior earned grade for such required class expunged.

Each local school board shall notify the parents of rising eleventh and twelfth grade students of (i) the requirements for graduation pursuant to the standards for accreditation and (ii) the requirements that have yet to be completed by the individual student.

B. Students identified as disabled who:

1. Complete alternative requirements, in the form of credit accommodations specified in their individualized education programs, to earn required standard and verified credits shall be awarded standard diplomas by local school boards. Such credit accommodations may include (i) approval of alternative courses to meet standard credit requirements, (ii) modifications to the requirements for local school divisions to award locally awarded verified credits, (iii) approval of additional tests to earn verified credits, (iv) adjusted cut scores required to earn verified credits, (v) allowance of work-based learning experiences, and (vi) special permission credit accommodations for locally awarded verified credits; and

2. Complete the requirements of their individualized education programs and meet certain requirements prescribed by the Board pursuant to regulations but do not meet the requirements for any named diploma shall be awarded Applied Studies diplomas by local school boards. The Board shall develop and implement statewide requirements for earning an Applied Studies diploma for implementation at the beginning of the 2022-2023 school year.

The Department shall develop guidance, in multiple languages, for students and parents (i) informing them of the alternative path to earn a standard diploma through credit accommodations, including special permission credit accommodations for locally awarded verified credits; (ii) conveying (a) the limitations of the applied studies diploma, (b) key curriculum and testing decisions that reduce the likelihood that a student will be able to obtain a standard diploma, and (c) a statement that the pursuit of an applied studies diploma may preclude a student's ability to pursue a standard diploma; and (iii) supporting them to discuss these diploma options at the student's individualized education program meetings.

Each local school board shall develop a process for awarding locally verified credits to students with disabilities, require individualized education program teams to consider credit accommodations, including locally awarded verified credits, for students with disabilities to enable them to earn a standard diploma, and provide guidance from the Department to parents of students with disabilities regarding the availability of credit accommodations to earn a standard diploma and the limitations of the Applied Studies diploma at a student's annual individualized education program meeting corresponding to grades three through 12 when curriculum or statewide assessment decisions are being made that impact the type of diploma for which the student can qualify.

Each local school board shall notify the parent of such students with disabilities who have an individualized education program and who fail to meet the graduation requirements of the student's right to a free and appropriate education to age 21, inclusive, pursuant to Article 2 (§ 22.1-213 et seq.) of Chapter 13.

C. Students who have completed a prescribed course of study as defined by the local school board shall be

ENGROSSED

SB1462E

59 awarded certificates of program completion by local school boards if they are not eligible to receive a Board-
60 approved diploma.

61 Each local school board shall provide notification of the right to a free public education for students who
62 have not reached 20 years of age on or before August 1 of the school year, pursuant to Chapter 1 (§ 22.1-1 et
63 seq.), to the parent of students who fail to graduate or who have failed to achieve graduation requirements as
64 provided in the standards for accreditation. If such student who does not graduate or complete such
65 requirements is a student for whom English is a second language, the local school board shall notify the
66 parent of the student's opportunity for a free public education in accordance with § 22.1-5.

67 D. In establishing graduation requirements, the Board shall:

68 1. Develop and implement, in consultation with stakeholders representing elementary and secondary
69 education, higher education, and business and industry in the Commonwealth and including parents,
70 policymakers, and community leaders in the Commonwealth, a Profile of a Virginia Graduate that identifies
71 the knowledge and skills that students should attain during high school in order to be successful contributors
72 to the economy of the Commonwealth, giving due consideration to critical thinking, creative thinking,
73 collaboration, communication, and citizenship.

74 2. Emphasize the development of core skill sets in the early years of high school.

75 3. Establish multiple paths toward college and career readiness for students to follow in the later years of
76 high school. Each such pathway shall include opportunities for internships, externships, and credentialing.

77 4. Provide for the selection of integrated learning courses meeting the Standards of Learning and approved
78 by the Board to satisfy graduation requirements, which shall include Standards of Learning testing, as
79 necessary.

80 5. Require students to complete at least one course in fine or performing arts or career and technical
81 education, one course in United States and Virginia history, and two sequential elective courses chosen from
82 a concentration of courses selected from a variety of options that may be planned to ensure the completion of
83 a focused sequence of elective courses that provides a foundation for further education or training or
84 preparation for employment.

85 6. Require that students (i) complete an Advanced Placement, honors, International Baccalaureate, or dual
86 enrollment course; (ii) complete a high-quality work-based learning experience, as defined by the Board; or
87 (iii) earn a career and technical education credential that has been approved by the Board, except when a
88 career and technical education credential in a particular subject area is not readily available or appropriate or
89 does not adequately measure student competency, in which case the student shall receive satisfactory
90 competency-based instruction in the subject area to earn credit. The career and technical education credential,
91 when required, could include the successful completion of an industry certification, a state licensure
92 examination, a national occupational competency assessment, the Armed Services Vocational Aptitude
93 Battery, or the Virginia workplace readiness skills assessment. The Department shall develop, maintain, and
94 make available to each local school board a catalogue of the testing accommodations available to English
95 language learners for each such certification, examination, assessment, and battery. Each local school board
96 shall develop and implement policies to require each high school principal or his designee to notify each
97 English language learner of the availability of such testing accommodations prior to the student's
98 participation in any such certification, examination, assessment, or battery.

99 7. Require students to be trained in emergency first aid, cardiopulmonary resuscitation, and the use of
100 automated external defibrillators, including hands-on practice of the skills necessary to perform
101 cardiopulmonary resuscitation.

102 8. Make provision in its regulations for students with disabilities to earn a diploma.

103 9. Require students to complete one virtual course, which may be a noncredit-bearing course.

104 10. Provide that students who complete elective classes into which the Standards of Learning for any
105 required course have been integrated and achieve a passing score on the relevant Standards of Learning test
106 for the relevant required course receive credit for such elective class.

107 11. Establish a procedure to facilitate the acceleration of students that allows qualified students, with the
108 recommendation of the division superintendent, without completing the 140-hour class, to obtain credit for
109 such class upon demonstrating mastery of the course content and objectives and receiving a passing score on
110 the relevant Standards of Learning assessment. Nothing in this section shall preclude relevant school division
111 personnel from enforcing compulsory attendance in public schools.

112 12. Provide for the award of credit for passing scores on industry certifications, state licensure
113 examinations, and national occupational competency assessments approved by the Board.

114 School boards shall report annually to the Board the number of Board-approved industry certifications
115 obtained, state licensure examinations passed, national occupational competency assessments passed, Armed
116 Services Vocational Aptitude Battery assessments passed, and Virginia workplace readiness skills
117 assessments passed, and the number of career and technical education completers who graduated. These
118 numbers shall be reported as separate categories on the School Performance Report Card.

119 For the purposes of this subdivision, "career and technical education completer" means a student who has

120 met the requirements for a career and technical concentration or specialization and all requirements for high
 121 school graduation or an approved alternative education program.

122 In addition, the Board may:

123 a. For the purpose of awarding credit, approve the use of additional or substitute tests for the correlated
 124 Standards of Learning assessment, such as academic achievement tests, industry certifications, or state
 125 licensure examinations; and

126 b. Permit students completing career and technical education programs designed to enable such students
 127 to pass such industry certification examinations or state licensure examinations to be awarded, upon obtaining
 128 satisfactory scores on such industry certification or licensure examinations, appropriate credit for one or more
 129 career and technical education classes into which relevant Standards of Learning for various classes taught at
 130 the same level have been integrated. Such industry certification and state licensure examinations may cover
 131 relevant Standards of Learning for various required classes and may, at the discretion of the Board, address
 132 some Standards of Learning for several required classes.

133 13. Provide for the waiver of certain graduation requirements and the subsequent award of a high school
 134 diploma (i) upon the Board's initiative, (ii) at the request of a local school board, or (iii) upon the request of
 135 the parent of any high school senior who died in good standing prior to graduation during the student's senior
 136 year. Such waivers shall be granted only for good cause and shall be considered on a case-by-case basis.

137 14. Consider all computer science course credits earned by students to be science course credits,
 138 mathematics course credits, or career and technical education credits. The Board shall develop guidelines
 139 addressing how computer science courses can satisfy graduation requirements.

140 15. Permit local school divisions to waive the requirement for students to receive 140 clock hours of
 141 instruction upon providing the Board with satisfactory proof, based on Board guidelines, that the students for
 142 whom such requirements are waived have learned the content and skills included in the relevant Standards of
 143 Learning.

144 16. Provide for the award of verified units of credit for a satisfactory score, as determined by the Board,
 145 on the Preliminary ACT (PreACT) or Preliminary SAT/National Merit Scholarship Qualifying Test
 146 (PSAT/NMSQT) examination.

147 17. Permit students to exceed a full course load in order to participate in courses offered by an institution
 148 of higher education that lead to a degree, certificate, or credential at such institution.

149 18. Permit local school divisions to waive the requirement for students to receive 140 clock hours of
 150 instruction after the student has completed the course curriculum and relevant Standards of Learning end-of-
 151 course assessment, or Board-approved substitute, provided that such student subsequently receives
 152 instruction, coursework, or study toward an industry certification approved by the local school board.

153 19. Permit any English language learner who previously earned a sufficient score on an Advanced
 154 Placement or International Baccalaureate foreign language examination or an SAT II Subject Test in a
 155 foreign language to substitute computer coding course credit for any foreign language course credit required
 156 to graduate, except in cases in which such foreign language course credit is required to earn an advanced
 157 diploma offered by a nationally recognized provider of college-level courses.

158 20. Permit a student who is pursuing an advanced diploma and whose individualized education program
 159 specifies a credit accommodation for world language to substitute two standard units of credit in computer
 160 science for two standard units of credit in a world language. For any student that elects to substitute a credit
 161 in computer science for credit in world language, his or her school counselor must provide notice to the
 162 student and parent or guardian of possible impacts related to college entrance requirements.

163 21. Permit any student to substitute elective credits for completion of any industry-approved workforce
 164 credential, provided that such credential is included on the list of credentials that are uniformly accepted as
 165 substitutes for such required credits developed and maintained by the Board pursuant to subsection F of §
 166 22.1-253.13:1.

167 22. *Permit any student to substitute the African American History course or the Advanced Placement*
 168 *African American Studies course for the [Virginia and U.S. World] History [II] course for the purpose of*
 169 *satisfying the history and social studies credit requirements, provided that enrollment in such an African*
 170 *American History course or Advanced Placement African American Studies course is available to the*
 171 *student.*

172 E. In the exercise of its authority to recognize exemplary performance by providing for diploma seals:

173 1. The Board shall develop criteria for recognizing exemplary performance in career and technical
 174 education programs by students who have completed the requirements for a Board of Education-approved
 175 diploma and shall award seals on the diplomas of students meeting such criteria.

176 2. The Board shall establish criteria for awarding a diploma seal for science, technology, engineering, and
 177 mathematics (STEM) for the Board-approved diplomas. The Board shall consider including criteria for (i)
 178 relevant coursework; (ii) technical writing, reading, and oral communication skills; (iii) relevant training; and
 179 (iv) industry, professional, and trade association national certifications.

180 3. The Board shall establish criteria for awarding a diploma seal for excellence in civics education and

181 understanding of our state and federal constitutions and the democratic model of government for the Board-
182 approved diplomas. The Board shall consider including criteria for (i) successful completion of history,
183 government, and civics courses, including courses that incorporate character education; (ii) voluntary
184 participation in community service or extracurricular activities that includes the types of activities that shall
185 qualify as community service and the number of hours required; and (iii) related requirements as it deems
186 appropriate.

187 4. The Board shall establish criteria for awarding a diploma seal of biliteracy to any student who
188 demonstrates proficiency in English and at least one other language for the Board-approved diplomas. The
189 Board shall consider criteria including the student's (i) score on a College Board Advanced Placement foreign
190 language examination, (ii) score on an SAT II Subject Test in a foreign language, (iii) proficiency level on an
191 ACTFL Assessment of Performance toward Proficiency in Languages (AAPPL) measure or another
192 nationally or internationally recognized language proficiency test, or (iv) cumulative grade point average in a
193 sequence of foreign language courses approved by the Board.

194 F. The Board shall establish, by regulation, requirements for the award of a general achievement adult
195 high school diploma for those persons who are not subject to the compulsory school attendance requirements
196 of § 22.1-254 and have (i) achieved a passing score on a high school equivalency examination approved by
197 the Board; (ii) successfully completed an education and training program designated by the Board; (iii)
198 earned a Board-approved career and technical education credential such as the successful completion of an
199 industry certification, a state licensure examination, a national occupational competency assessment, the
200 Armed Services Vocational Aptitude Battery, or the Virginia workplace readiness skills assessment; and (iv)
201 satisfied other requirements as may be established by the Board for the award of such diploma.

202 G. To ensure the uniform assessment of high school graduation rates, the Board shall collect, analyze,
203 report, and make available to the public high school graduation and dropout data using a formula prescribed
204 by the Board.

205 H. The Board shall also collect, analyze, report, and make available to the public high school graduation
206 and dropout data using a formula that excludes any student who fails to graduate because such student is in
207 the custody of the Department of Corrections, the Department of Juvenile Justice, or local law enforcement.
208 For the purposes of the Standards of Accreditation, the Board shall use the graduation rate required by this
209 subsection.

210 I. The Board may promulgate such regulations as may be necessary and appropriate for the collection,
211 analysis, and reporting of such data required by subsections G and H.
