Bill Number: HB1835 ER

Patron: Wiley

Bill Title: Professions and occupations; regulation of geologists; licensure; penalty

Bill Summary: Provides that professional geologists shall be licensed by the Board for Professional Soil Scientists, Wetland Professionals, and Geologists. Under the current law, professional geologists are certified by the Board. The bill requires the Board to issue a license to any individual who holds an unexpired certification to practice as a geologist issued prior to July 1, 2025. The bill also makes any person practicing or offering to practice geology without holding such license from the Board guilty of a Class 1 misdemeanor. The bill requires the Board to promulgate regulations to implement the provisions of the bill to be effective within 280 days of the bill's enactment.

Budget Amendment Necessary: No.

Items Impacted: None.

Explanation: This bill impacts the Department of Professional and Occupational Regulation (DPOR) and Department of Energy; however, no budget action is required. See Fiscal Analysis section, below.

Fiscal Summary: It is anticipated that any fiscal impact to DPOR and Energy can be absorbed within existing resources.

Fiscal Analysis: The bill replaces the current voluntary certification of professional geologists with a mandatory licensure. According to DPOR, there are currently 930 certified geologists in Virginia. The bill directs the Board to issue a license to anyone holding an unexpired certification prior to July 1, 2025, which could create a significant short term increase in workload. DPOR estimates that 500 hours of temporary staffing, at a rate of \$20 per hour, will be required to process the applications in a timely manner, resulting in a cost of \$10,000. The bill does not include a fee amount for the new licensure. The current fee for voluntary certification is \$90. If biennial revenues exceed expenses by more than 20 percent, the Board would need to reduce fees in compliance with the Callahan Act (§ 54.1-113); however if expenses exceed revenue fees may need to be increased.

The bill creates a Class 1 misdemeanor for anyone who practices geology or represents themselves as a licensed geologist without first obtaining the license. Anyone convicted of a Class 1 misdemeanor is subject to a sentence of up to 12 months in jail and a fine of not more than \$2,500, either or both. There is not enough information available to reliably estimate the increase in jail population as a result of this proposal. However, any increase in jail population will increase costs to the state. The Commonwealth currently pays localities

\$5.00 a day for each misdemeanor or otherwise local-responsible prisoner held in a jail. It also funds a large portion of the jails' operating costs, e.g., correctional officers. The state's share of these costs on a per prisoner, per day basis varies from locality to locality. However, according to the Compensation Board's most recent Jail Cost Report (November 2024), the estimated total state support for local jails averaged \$56.38 per inmate, per day in FY 2023.

The Department of Energy employs geologists and anticipates paying any necessary licensing fees. Energy estimates this cost may be up to \$750 annually, which can be absorbed within existing resources.

Other: None.
