

26100554D

1 **HOUSE BILL NO. 277**

2 Offered January 14, 2026

3 Prefiled January 9, 2026

4 A BILL to amend and reenact § 15.2-2316.4:2 of the Code of Virginia, relating to zoning; wireless
5 communications infrastructure; application process.

6 Patron—Seibold

7 Committee Referral Pending

8 **Be it enacted by the General Assembly of Virginia:**9 **1. That § 15.2-2316.4:2 of the Code of Virginia is amended and reenacted as follows:**10 **§ 15.2-2316.4:2. Application reviews.**11 A. In its receiving, consideration, and processing of a complete application submitted under subsection A
12 of § 15.2-2316.4:1 or for any zoning approval required for a standard process project, a locality shall not:

13 1. Disapprove an application on the basis of:

14 a. The applicant's business decision with respect to its designed service, customer demand for service, or
15 quality of its service to or from a particular site;16 b. The applicant's specific need for the project, including the applicant's desire to provide additional
17 wireless coverage or capacity; or

18 c. The wireless facility technology selected by the applicant for use at the project;

19 2. Require an applicant to provide proprietary, confidential, or other business information to justify the
20 need for the project, including propagation maps and telecommunications traffic studies, or information
21 reviewed by a federal agency as part of the approval process for the same structure and wireless facility,
22 provided that a locality may require an applicant to provide a copy of any approval granted by a federal
23 agency, including conditions imposed by that agency;24 3. Require the removal of existing wireless support structures or wireless facilities, wherever located, as a
25 condition for approval of an application. A locality may adopt reasonable rules with respect to the removal of
26 abandoned wireless support structures or wireless facilities;27 4. Impose surety requirements, including bonds, escrow deposits, letters of credit, or any other types of
28 financial surety, to ensure that abandoned or unused wireless facilities can be removed, unless the locality
29 imposes similar requirements on other permits for other types of similar commercial development. Any such
30 instrument shall not exceed a reasonable estimate of the direct cost of the removal of the wireless facilities;31 5. Discriminate or create a preference on the basis of the ownership, including ownership by the locality,
32 of any property, structure, base station, or wireless support structure, when promulgating rules or procedures
33 for siting wireless facilities or for evaluating applications;34 6. Impose any unreasonable requirements or obligations regarding the presentation or appearance of a
35 project, including unreasonable requirements relating to (i) the kinds of materials used or (ii) the arranging,
36 screening, or landscaping of wireless facilities or wireless structures;37 7. Impose any requirement that an applicant purchase, subscribe to, use, or employ facilities, networks, or
38 services owned, provided, or operated by a locality, in whole or in part, or by any entity in which a locality
39 has a competitive, economic, financial, governance, or other interest;40 8. Condition or require the approval of an application solely on the basis of the applicant's agreement to
41 allow any wireless facilities provided or operated, in whole or in part, by a locality or by any other entity, to
42 be placed at or co-located with the applicant's project;43 9. Impose a setback or fall zone requirement for a project that is larger than a setback or fall zone area that
44 is imposed on other types of similar structures of a similar size, including utility poles;45 10. Limit the duration of the approval of an application, except a locality may require that construction of
46 the approved project shall commence within two years of final approval and be diligently pursued to
47 completion; or48 11. Require an applicant to perform services unrelated to the project described in the application,
49 including restoration work on any surface not disturbed by the applicant's project;50 12. Except as provided in subsections B and D, disapprove an application if the proposed new wireless
51 support structure provides additional wireless coverage or capacity for first responders or schools; or52 13. Except as provided in subsections B and D, disapprove an application if the proposed new wireless
53 support structure is not within a four-mile radius of an existing wireless support structure.54 B. Nothing in this article shall prohibit a locality from disapproving an application submitted under
55 subsection A of § 15.2-2316.4:1 or for any zoning approval required for a standard process project:

56 1. On the basis of the fact that the proposed height of any wireless support structure, wireless facility, or

INTRODUCED

HB277

59 wireless support structure with attached wireless facilities exceeds 50 150 feet above ground level, provided
60 that the locality follows a local ordinance or regulation that does not unreasonably discriminate between the
61 applicant and other wireless services providers, wireless infrastructure providers, providers of
62 telecommunications services, and other providers of functionally equivalent services; or

63 2. That proposes to locate a new structure, or to co-locate a wireless facility, in an area where all cable and
64 public utility facilities are required to be placed underground by a date certain or encouraged to be
65 undergrounded as part of a transportation improvement project or rezoning proceeding as set forth in
66 objectives contained in a comprehensive plan, if:

67 a. The undergrounding requirement or comprehensive plan objective existed at least three months prior to
68 the submission of the application;

69 b. The locality allows the co-location of wireless facilities on existing utility poles, government-owned
70 structures with the government's consent, existing wireless support structures, or a building within that area;

71 c. The locality allows the replacement of existing utility poles and wireless support structures with poles
72 or support structures of the same size or smaller within that area; and

73 d. The disapproval of the application does not unreasonably discriminate between the applicant and other
74 wireless services providers, wireless infrastructure providers, providers of telecommunications services, and
75 other providers of functionally equivalent services.

76 The locality may also disapprove an application if the applicant has not given written notice to adjacent
77 landowners at least 15 days before it applies to locate a new structure in the area.

78 C. Nothing in this article shall prohibit an applicant from voluntarily submitting, and the locality from
79 accepting, any conditions that otherwise address potential visual or aesthetic effects resulting from the
80 placement of a new structure or facility.

81 D. Nothing in this article shall prohibit a locality from disapproving an application submitted under a
82 standard process project on the basis of the availability of existing wireless support structures within a
83 reasonable distance that could be used for co-location at reasonable terms and conditions without imposing
84 technical limitations on the applicant.
