E. To the extent allowed by federal law and regulations, priority for utilization of permit fees shall be given to cover the costs of processing permit applications in order to more efficiently issue permits.

F. Fees collected pursuant to this section shall not supplant or reduce in any way the general fund appropriation to the Department.

G. The permit fees shall apply to permit programs in existence on July 1, 1992, any additional permit programs that may be required by the federal government and administered by the Department, or any new permit program required by the Code of Virginia.

H. The permit program fee regulations promulgated pursuant to this section shall not become effective until July 1, 1993.

§ 56-265.2:1. Approval by Commission required for construction of certain gas pipelines and related facilities; notice and hearing.

A. Whenever a certificate is required pursuant to § 56-265.2 for the construction of a pipeline for the transmission or distribution of manufactured or natural gas, the Commission shall consider the effect of the pipeline on the environment, public safety, and economic development in the Commonwealth, and may establish such reasonably practical conditions as may be necessary to minimize any adverse environmental or public safety impact. In such proceedings, the Commission shall receive and consider all reports by state agencies concerned with environmental protection; and, if requested by any county or municipality in which the pipeline is proposed to be constructed, local comprehensive plans that have been adopted pursuant to Article 3 (§ 15.2-2223 et seq.) of Chapter 22 of Title 15.2.

B. The Commission shall not approve construction of any such pipeline unless the public utility has provided 30 days' advance public notice of the proposed pipeline by (i) publishing a notice in a newspaper or newspapers of general circulation in each of the counties and municipalities through which the pipeline is proposed to be constructed, (ii) providing written notice to the governing body of each such county and municipality, (iii) causing to be sent a copy of the notice by first class mail to all owners of property within the route of the proposed pipeline, as indicated on the map or sketch of the route filed with the Commission, which requirement shall be satisfied by mailing the notice to such persons at such addresses as are indicated in the land books maintained by the commissioner of revenue, director of finance or treasurer of the county or municipality, and (iv) filing a copy of any plans, specifications, or maps of the proposed pipeline with the Commission, which plans, specifications, or maps shall be made available for public inspection at the Commission's business office, during normal business hours. Any notice required by this subsection shall include a written description of the proposed route the line is to follow, a map or sketch of the route, and

431 information regarding the time period during which persons may request a public hearing under subsection C
432 of this section.

433 *As a condition to approval, the Commission shall determine that the corridor or route chosen for the line*
434 *will avoid or minimize adverse impacts to the greatest extent reasonably practicable on cultural resources*
435 *identified by federally recognized tribes.*

436 C. If, within 45 days after publication and mailing of the notices required in subsection B of this section,
437 any interested party requests a public hearing, the Commission shall, as soon as reasonably practicable after
438 such request, hold such hearing or hearings at such place as may be designated by the Commission. If written
439 requests therefor are received from 20 or more interested parties, the Commission shall hold at least one
440 hearing in the area that would be affected by construction of the pipeline, for the purpose of receiving public
441 comment on the proposal. If any hearing is to be held in the area affected, the Commission shall direct that a
442 copy of the transcripts of any previous hearings held in the case be made available for public inspection at a
443 convenient location in the area for a reasonable time before such local hearing.

444 D. For the purposes of this section; ~~"interested:~~

445 *"Environment" or "environmental" is deemed to include in meaning "historic."*

446 *"Federally recognized tribe" means the same as that term is defined in § 2.2-401.01.*

447 *"Interested parties" means the governing bodies of any counties or municipalities through which the*
448 *pipeline is to be constructed, and persons residing or owning property within one-half mile of such pipeline.*
449 ~~For the purposes of this section, "environment" or "environmental" shall be deemed to include in meaning~~
450 ~~"historic."~~

451 E. If a significantly different route is determined more desirable after the giving of the notice required in
452 subsection B of this section, the Commission shall cause notice of the new route or routes to be published and
453 mailed in accordance with subsection B of this section. The Commission shall thereafter comply with the
454 provisions of this section to the full extent necessary to give *federally recognized tribes and* interested parties
455 in the newly affected areas the same protection afforded interested parties affected by the route described in
456 the original notice.

457 F. Approval of a pipeline pursuant to this section shall be deemed to satisfy and supersede the
458 requirements of § 15.2-2232 and local zoning ordinances with respect to such pipeline and related facilities;
459 however, the Commission shall not approve the construction of a natural gas compressor station in an area
460 zoned exclusively for residential use unless the public utility provides certification from the local governing
461 body that the natural gas compressor station is consistent with the zoning ordinance. The certification
462 required by this subsection shall be deemed to have been waived unless the local governing body informs the
463 Commission and the public utility of the natural gas compressor station's compliance or noncompliance
464 within 45 days of the public utility's written request.

465 G. *The Commission shall enter into a memorandum of agreement with the Department of Environmental*
466 *Quality regarding the coordination of their reviews of the environmental impact of gas pipelines and*
467 *associated facilities. If the proposed pipelines or associated facilities are in a locality identified by the*
468 *Ombudsman for Tribal Consultation pursuant to subdivision B 2 of § 2.2-401.01, such consultation*
469 *information shall be included in the memorandum of agreement.*

470 **§ 62.1-44.38:1. Comprehensive water supply planning process; state, regional, and local water**
471 **supply plans.**

472 A. The Board, with advice and guidance from the Commissioner of Health, local governments, public
473 service authorities, and other interested parties, shall establish a comprehensive water supply planning
474 process for the development of local, regional, and state water supply plans consistent with the provisions of
475 this chapter. This process shall be designed to (i) ensure that adequate and safe drinking water is available to
476 all citizens of the Commonwealth; (ii) encourage, promote, and protect all other beneficial uses of the
477 Commonwealth's water resources; (iii) encourage, promote, and develop incentives for alternative water
478 sources, including desalinization; and (iv) encourage the development of cross-jurisdictional water supply
479 projects.

480 B. The Board shall adopt regulations designating regional planning areas based primarily on river basins
481 as appropriate based on water supply sources. The Board shall consider existing interjurisdictional
482 arrangements in designating regional planning areas. The Board may, as appropriate, designate multiple
483 regional planning areas within a single river basin in order to enhance the manageability of planning within
484 such basin. The regulations shall identify the particular regional planning area in which each locality shall
485 participate and shall state which local stakeholder groups, including local governments, industrial and
486 agricultural water users, public water suppliers, developers and economic development organizations, and
487 conservation and environmental organizations, shall or may participate in coordinated water resource
488 planning. The regulations shall provide a mechanism for a locality to request a change of its designated
489 regional planning area to an adjoining planning area that is based on water supply source, river basin, or
490 existing or planned cross-jurisdictional relationship, which change shall be effective upon approval of the
491 Department, notwithstanding the provisions of Article 2 (§ 2.2-4006 et seq.) of Chapter 40 of Title 2.2. *For*
492 *localities identified by the Ombudsman for Tribal Consultation pursuant to subdivision B 2 of § 2.2-401.01,*

the Board shall ensure that the Department consults with any potentially impacted federally recognized tribe pursuant to the policies and procedures adopted by the Department pursuant to § 10.1-1186.3:1. Should feedback from potentially impacted federally recognized tribes not be received by the deadline established in the Department's policies and procedures, the consultation provisions of this section shall be deemed fulfilled. For the purposes of this subsection, "federally recognized tribe" means the same as that term is defined in § 2.2-401.01. The regulations shall further recognize the localities that include any portion of the service area of a water supply utility in the Commonwealth that uses the Potomac River as a water supply source as a distinct regional planning area. Such plan shall incorporate the provisions of the Metropolitan Washington Water Supply and Drought Awareness Response Plan: Potomac River System (2000), including provisions related to triggers, actions, and messages for the Potomac River drought evaluation region. Nothing in this subsection regarding the incorporation of such provisions shall be construed to limit the authority of the Governor during a declared drought emergency.

C. 1. Each locality in a regional planning area shall participate in cross-jurisdictional, coordinated water resource planning. Such local coordination shall accommodate existing regional groups that have already developed water supply plans, including planning district commissions, and other regional planning entities as appropriate.

2. Each locality in a regional planning area shall develop and submit, with the other localities in that planning area, a single jointly produced regional water supply plan to the Department of Environmental Quality (the Department). Such regional water supply plan shall (i) clearly identify the region's water supply risks and (ii) propose regional strategies to address those water supply risks.

3. Each regional water supply plan also shall comply with applicable criteria and guidelines developed by the Board. Such criteria and guidelines shall take into account existing local and regional water supply planning efforts and requirements imposed under other state or federal laws. The criteria and guidelines established by the Board shall not prohibit a town from entering into a regional water supply plan with an adjacent county in the same regional planning area.

4. This section is intended to inform any regional water resource planning being done in the Commonwealth pursuant to interstate compacts.

D. The Board and the Department shall prioritize the allocation of planning funds and other funds to localities that sufficiently participate in regional planning.

E. In accordance with subdivision B 2 of § 62.1-44.38, the Department shall facilitate regional planning and provide assistance to each regional planning area as needed.

§ 62.1-248. Permits.

A. Any permit issued by the Board shall include a flow requirement appropriate for the protection of beneficial instream uses. In determining the level of flow in need of protection, the Board shall consider, among other things, recreational and aesthetic factors and the potential for substantial and long-term adverse impact on fish and wildlife found in that particular surface water management area. Should this determination indicate a need to restrict water withdrawal, the Board shall consider, among other things, the availability of alternative water supplies, the feasibility of water storage or other mitigation measures, and the socioeconomic impacts of such restrictions on the potentially affected water users and on the citizens of the Commonwealth in general.

In its permit decision, the Board shall attempt to balance offstream and instream water uses so that the welfare of the citizens of the Commonwealth is maximized without imposing unreasonable burdens on any individual water user or water-using group. The decision to implement this balance may consist of approval of withdrawal without restriction, approval subject to conditions designed to protect instream uses from unacceptable adverse effects, or disapproval of the withdrawal.

Permit conditions may include, but are not limited to, the following: (i) maximum amounts which may be withdrawn, (ii) times of the day or year during which withdrawals may occur, and (iii) requirements for voluntary and mandatory conservation measures.

B. In considering whether to issue, modify, revoke, or deny a permit under this section, the Board shall consider:

1. The number of persons using a stream and the object, extent and necessity of their respective withdrawals or uses;

2. The nature and size of the stream;

3. The types of businesses or activities to which the various uses are related;

4. The importance and necessity of the uses claimed by permit applicants, or of the water uses of the area and the extent of any injury or detriment caused or expected to be caused to instream or offstream water uses;

5. The effects on beneficial uses; and

6. Any other relevant factors.

C. Permits shall be transferable among users, subject to approval by the Board.

D. In developing regulations governing the issuance of permits, the Board shall prioritize among types of users. Domestic and existing uses shall be given the highest priority in the issuance of permits for other beneficial uses. Included among existing uses shall be any projected use which has been relied upon in the

555 development of an industrial project and for which a permit has been obtained by January 1, 1989, pursuant
556 to § 404 of the Clean Water Act.

557 *E. If the proposed permit will allow for surface water withdrawals greater than 365 million gallons per*
558 *year in a locality identified by the Ombudsman for Tribal Consultation pursuant to subdivision B 2 of*
559 *§ 2.2-401.01, the Board shall ensure that the Department consults with any potentially impacted federally*
560 *recognized tribe pursuant to the policies and procedures adopted by the Department pursuant to*
561 *§ 10.1-1186.3:1. Should feedback from potentially impacted federally recognized tribes not be received by*
562 *the deadline established in the Department's policies and procedures, the consultation provisions of this*
563 *section shall be deemed fulfilled. For the purposes of this subsection, "federally recognized tribe" means the*
564 *same as that term is defined in § 2.2-401.01.*
