

1 VIRGINIA ACTS OF ASSEMBLY — CHAPTER

2 *An Act to amend and reenact § 38.2-3447 of the Code of Virginia, relating to health insurance; tobacco*
 3 *surcharge.*

4 [S 630]

5 Approved

6 **Be it enacted by the General Assembly of Virginia:**7 **1. That § 38.2-3447 of the Code of Virginia is amended and reenacted as follows:**8 **§ 38.2-3447. Restrictions relating to premium rates.**

9 A. Notwithstanding any provision of § 38.2-3432.2, 38.2-3501, 38.2-4306, or any other section of this
 10 title to the contrary, a health carrier offering a health benefit plan providing individual or small group health
 11 insurance coverage shall develop its premium rates based on the following:

- 12 1. Whether the health benefit plan covers an individual or family;
- 13 2. Rating areas, as may be established by the Commission; *and*
- 14 3. Age, except that the rate shall not vary by more than 3 to 1 for adults; ~~and~~
- 15 4. ~~Tobacco use, except that the rate shall not vary by more than 1.5 to 1.~~

16 B. A premium rate shall not vary with respect to any particular health benefit plan by any other factor not
 17 described in subsection A.

18 C. Rating variations for family coverage shall be applied based on the portion of the premium that is
 19 attributable to each family member covered under the health benefit plan.

20 D. If the proposed area rate factors set forth in a rate filing for individual or small group health insurance
 21 coverage by a health carrier for a rating area exceed by more than 15 percent the weighted average of the
 22 proposed area rate factors among all rating areas in which the health carrier offers health benefit plans in that
 23 market, then:

24 1. The health carrier's rate filing shall include in a publicly available and unredacted form:

25 a. A comparison of the area rate factor for individual and small group health benefit plans that utilize the
 26 same provider network and provider reimbursement levels of the health benefit plans that are subject to the
 27 filing;

28 b. A detailed disclosure of the area rate factor methodology, which disclosure shall include any third-party
 29 resources or representations from a person other than the signing actuary, on which the signing actuary relied,
 30 provided that disclosure of third-party resources shall address that the source data only reflects differences in
 31 unit cost and provider practice patterns; and

32 c. To the extent that the health carrier is deriving any area rate factor from experience data, by rating area
 33 for the experience period used:

34 (1) The (i) total enrollment; (ii) total premiums; (iii) allowed claims; (iv) incurred claims excluding
 35 anticipated or, if available, actual risk adjustment payments or receipts; (v) incurred claims including
 36 anticipated or, if available, actual risk adjustment payments or receipts; and (vi) loss ratio for each of their
 37 rating areas in that market; and

38 (2) Aggregated incurred claims for any health system exceeding 30 percent of total incurred claims for
 39 that rating area in that market.

40 2. The Commission shall hold a public hearing on the proposed premium rates prior to the approval of the
 41 rate filing.

42 3. The Commission shall not approve the proposed rate filing if (i) a variance in area rate factors, indexed
 43 to the same rating region for both the individual and small group markets, of 15 percent or more exists
 44 between health benefit plans a carrier intends to offer in the individual market and health benefit plans
 45 intended to be offered in the small group market, when those plans utilize the same provider network and
 46 provider reimbursement levels and (ii) the methodologies used to calculate the area rate factors are different
 47 between the two markets.

48 E. Beginning for plan year 2020, a health carrier with an approved rate filing that contains at least one
 49 area rate factor that exceeds by more than 25 percent the weighted average of the area rate factors among all
 50 rating areas in a market in which the health carrier offers individual or small group health insurance coverage
 51 shall file with the Commission for each calendar quarter during that plan year a report that provides, for each
 52 rating area within the market in which the health carrier operates, the plan's (i) enrollment; (ii) total
 53 premiums; (iii) allowed claims; (iv) incurred claims excluding anticipated or, if available, actual risk
 54 adjustment payments or receipts; (v) incurred claims including anticipated or, if available, actual risk
 55 adjustment payments or receipts; (vi) loss ratio; and (vii) aggregate incurred claims, for each health system
 56 exceeding 25 percent of total incurred claims for that rating area. The health carrier shall make each such

57 quarterly report publicly available, without redaction, not later than 45 days after the end of the calendar
58 quarter.

59 F. As used in ~~subdivisions~~ *subsections* D and E:

60 "Allowed claims" means the amount of claims of a covered person for health care services that are owed
61 pursuant to the terms of the covered person's health benefits plan, including payment made by the covered
62 person's health carrier, and cost-sharing obligations owed by or on behalf of the covered person.

63 "Health system" means an organization that consists of either (i) at least one hospital plus at least one
64 group of physicians or (ii) more than one group of physicians.

65 "Incurred claims" means allowed claims less copayments, deductible amounts, and other cost-sharing
66 obligations owed by or on behalf of a covered person.

67 "Methodologies," when referring to the calculation of area rate factors, includes (i) the types of inputs,
68 including experience period claims data, third-party database, other sources of data, and (ii) the series of
69 calculations that are used to derive area rate factors. This definition shall not preclude a health carrier from
70 calculating area rate factors for rates for the individual market, based on the cost and care delivery practices
71 associated with the providers expected to be utilized by covered persons that reside in a given rating area,
72 while calculating area rate factors for rates for the small group market, based on those providers that are
73 expected to be utilized by individuals employed by small employers that are located in the rating area without
74 regard to where the covered persons reside.

75 "Provider" means a health care provider, as defined in § 38.2-3438, that is affiliated or in-network with a
76 health carrier.

77 "Weighted average," when referring to area rate factors, means the mean of the area rate factors when
78 weighted based on the projected number of covered persons distributed by rating area.

79 **2. That the provisions of this act shall apply to health benefit plans providing individual or small group**
80 **health insurance coverage entered into, amended, extended, or renewed on or after January 1, 2027.**
