SENATE BILL NO. 758  
AMENDMENT IN THE NATURE OF A SUBSTITUTE  
(Proposed by the House Committee on Labor and Commerce  
on \_\_\_\_\_)  
(Patron Prior to Substitute—Senator Rouse)

A BILL to amend the Code of Virginia by adding in Chapter 3 of Title 40.1 an article numbered 1.2, consisting of sections numbered 40.1-28.13 through 40.1-28.16, relating to construction work on solar energy facilities; prevailing wage rate; apprenticeship requirements; civil penalties; report.

Be it enacted by the General Assembly of Virginia:

1. That the Code of Virginia is amended by adding in Chapter 3 of Title 40.1 an article numbered 1.2, consisting of sections numbered 40.1-28.13 through 40.1-28.16, as follows:

Article 1.2.

Prevailing Wage for Construction Work on Solar Energy Facilities.

§ 40.1-28.13. Definitions.

As used in this article, unless the context requires a different meaning:

"Prevailing wage rate" means the rate, amount, or level of wages, salaries, benefits, and other remuneration prevailing for the corresponding class of mechanics, laborers, or workers employed for the same work in the same trade or occupation in the locality where the facility or immovable property that is the subject of solar energy facility work is located, as determined by the Commissioner in accordance with § 2.2-4321.3.

"Solar developer" means any developer of a solar energy facility, including any electric utility as defined in § 56-576 and any person required to be licensed under the provisions of § 56-587, and any of its contractors or subcontractors.

"Solar energy facility" means a renewable energy project that (i) generates electricity from sunlight, (ii) consists of one or more PV systems and other appurtenant structures and facilities within the boundaries of the site, and (iii) is designed for or capable of operation at a rated capacity greater than five megawatts. "Solar energy facility" includes two or more solar energy facilities otherwise spatially separated but under common ownership or operational control that are connected to the electrical grid under a single interconnection agreement.

§ 40.1-28.14. Prevailing wage for construction work on solar energy facilities; civil penalties.

A. Each solar developer, when procuring services, letting contracts, or overseeing or administering contracts for construction work on a solar energy facility, shall ensure that its bid specifications or other contracts applicable to construction work on such solar energy facility require bidders, offerors, contractors, and subcontractors to pay wages, salaries, benefits, and other remuneration to any mechanic, laborer, or worker employed, retained, or otherwise hired to perform services in connection with the contract at the prevailing wage rate. Each contract for construction work on a solar energy facility by a public service company or third-party developer shall contain a provision requiring that the remuneration to any individual performing the work of any mechanic, laborer, or worker on the work contracted to be done shall be at a rate equal to the prevailing wage rate.

B. In addition to liability for the nonpayment of wages provided in § 40.1-29, any solar developer that fails to comply with the requirements of this section shall be required to make a payment to the Commissioner of Labor and Industry of \$5,000 for each employee who was paid wages at a rate less than the prevailing wage rate. However, if the Commissioner of Labor and Industry determines that such solar developer's failure to comply with the requirements of this section is due to intentional disregard of the provisions of this section, such solar developer shall be required to make a payment to the Commissioner of Labor and Industry of \$10,000 for each employee who was paid wages at a rate less than the prevailing wage rate. Civil penalties owed under this section shall be paid to the Commissioner for deposit in the general fund and the Commissioner shall prescribe procedures for the payment of proposed assessments of civil penalties that are not contested by employers.

§ 40.1-28.15. Apprenticeship requirements; civil penalties.

A. As used in this section, "qualified apprentice" means an individual who is employed by a solar developer and who is participating in a registered apprenticeship program pursuant to Article 3 (§ 2.2-2043 et seq.) of Chapter 20.2 of Title 2.2.

B. Each solar developer engaged in the construction of solar energy facilities shall ensure that, beginning July 1, 2027, 15 percent of the total labor hours of construction work, including construction work performed by any contractor or subcontractor, is performed by qualified apprentices.

C. Each solar developer that employs four or more individuals to perform construction work on a solar energy facility shall employ at least one qualified apprentice to perform such work.

D. The requirements of this section shall be deemed satisfied if the solar developer has requested

HOUSE SUBSTITUTE
